## A few words about Woodlands...

Since its inception in 1947 WOODLANDS has steadily emerged as one of India's most reliable institutions of medical care. Its enviable reputation as a leading hospital in the country has been ensured by keeping track of global advancements in medical science, investing in state-of-the-art equipment and appliances, as well as attracting country's best talent backed by a dedicated team of nursing staff and other specialities, groomed in the WOODLANDS culture.

WOODLANDS is controlled by a Board of Governors consisting of top executives from the blue chip business houses and other eminent personalities. It is managed by top medical and administrative professionals assisted by a team of well-trained nurses. These facilities enable WOODLANDS to treat every case with meticulous care on its way to quick recovery.

## Overview & Objectives

### “EXCELLENCE IN LASER UROLOGICAL SURGERY”

Woodlands Medical Centre Limited, Kolkata. April 21-22, 2007

The application of lasers in urological surgery is not new. However, great refinements in have been made over the last few years in the laser treatment of urological disorders, and in particular, the therapies of benign prostatic hyperplasia and stone disease are being redefined. We have felt it important that there be a live demonstration of laser techniques for the benefit of the Indian urologists, and create a forum for discussion of the many nuances of such therapy, and its safety, efficacy, and cost-effectivity in the Indian patient population.

Our chief resource person is Professor Andreas Gross of Hamburg and Gottingen, an expert in the field of endourology, and a pioneer in laser applications for BPH and urolithiasis. He will demonstrate for us, live, his surgical techniques, and take part in the deliberations. He will be joined by a faculty of national experts, in this field.

We expect to demonstrate live the many techniques of laser treatments of BPH in comparison with conventional electroresection and emerging bipolar resection of prostate. A section of the workshop will deal with laser lithotripsy, and laser treatment of soft tissue urological problems.

The workshop is organized by the Department of Urology, Woodlands Medical Centre Ltd., in association with the Academic Unit of the hospital.

Please do come and join us in April 2007, and make this meeting a grand success!

## Target Participants ■ Registration Tariff
